

Maritime Controls Inc. and First Thermal Heaters team up to benefit customers

First Thermal Heaters (FTH), a division of Industrial Kiln & Dryer Group, has the pleasure of announcing its new authorized field service agency - Maritime Controls, Inc. Effective immediately, Maritime Controls, Inc. is uniquely qualified to deliver their award-winning field service support to the FTH marine-based customers worldwide.

Maritime Controls, Inc. has a 30-year successful history of servicing various types of vessels including, but not limited to: Liquefied Natural Gas Carriers (LNGC), Oil Tankers, Container, Floating Production Storage and Offloading (FPSO). Below is a sample of experience areas that will enhance the already dynamic FTH capabilities:

Automation and control systems

Combustion Controls

Burner Management and Tune Ups

Heater Maintenance, Training, and Preventative Maintenance Programs

Heater Start Up and Installation

Heater Rebuilds and Component Replacements

All of First Thermal field crews are factory trained and have thousands of combined hours of on-site start-up and maintenance experience. This new alliance will empower First Thermal Heaters professionals to react even more efficiently and decisively to any marine heater servicing requirement both domestically and internationally.
